TITLE OF THE RESEARCH PROJECT: *Rediscovered landraces: alternative cultivation strategies for a sustainable and resilient agriculture (VALORE).*

BRIEF DESCRIPTION OF THE RESEARCH PROJECT: *VALORE is an information and demonstration project focused on some local varieties of maize, potato and bean of particular interest to the Lombardy region. The main objectives of the project are: to provide an improved knowledge on traditional cultivation practices and their advantages for the cultivation of landraces in a context of marginal areas; to inform farmers on the importance of agrobiodiversity and landraces for the valorisation of marginal areas; to demonstrate, through the setting up of ad hoc demonstration fields, how to implement these alternative cultivation strategies and the advantages deriving from their application. The project will provide the interested farmers with the necessary technical tools and appropriate genetics and agronomic knowledge to achieve an economically advantageous qualitative-quantitative production through the use of appropriate cultivation techniques of traditional landraces and ancient cultivars of maize, potato and beans.*
