UNIVERSITÀ
CATTOLICA
del Sacro Cuore

UCSC ExpoLAB

ExpoLAB is a multidisciplinary Centre of Università Cattolica del Sacro Cuore, founded in 2011, acting on the theme "Feeding the Planet, Energy for Life" of Expo 2015, which will be held in Milan.

ExpoLAB promotes, coordinates and conducts the scientific activities of Università Cattolica on the themes of the upcoming Universal Exposition, with a scientific yet multidisciplinary approach.

The initiatives involve all the different skills and knowledge present in UCSC, with the collaboration of different Universities, Research Centers as well as national and international institutions that deal with sustainability and nutritional issues.

Moreover Università Cattolica is a member of the International Scientific Committee for Expo 2015, and through ExpoLAB collaborates with the leading European institutions involved in the Expo.

There are three pathways which will provide tools and thoughts for the development of an innovative approach towards the Expo theme. These paths will pivot the integration of multiple levels:

- **philosophic and anthropologic**, with a focus on the cultural perspective of the relation between food and human being, as well as **socio economic** and **psycho pedagogical** referring to the right to food and human development
- **scientific** through a food risk's analysis from different point of views: consumer behavior; food law; economy and international relations; communication and risk assessment
- **socio economic**, linked to the themes of international cooperation and the perspectives for a sustainable future
