

24 January 2022
Expo 2020 Dubai
The Italy Pavilion

Context

The **International UNESCO Chairs Forum on the Futures of Higher Education** is being organized jointly by Italy and UNESCO at Expo 2020 Dubai to mark the International Day of Education 2022. The Forum fits within the overall framework of UNESCO's [Futures of Education](#) initiative which seeks to generate an agenda for global debate, research and action on the futures of education, learning and knowledge in a world of increasing complexity, uncertainty and precarity. It is also one of the preparatory events for the 3rd UNESCO World Higher Education Conference ([WHEC2022](#)) to be held 18-20 May 2022 in Barcelona, Spain. WHEC2022 and its preparatory events aim to define and prepare knowledge-based, participatory scenarios to shape a new era of higher education systems and institutions, particularly in the wake of the COVID-19 disruption.

The International UNESCO Chairs Forum offers a platform to leverage collective interdisciplinary intelligence relative to the futures of higher education systems, with a focus on skills development in the context of the uncertain futures of work, as well as on the digital transformation of our societies and its implications for higher education. The Declaration of the Italian UNESCO Chairs for Sustainability will also be presented.

Skills for Work and Life

Today's world is experiencing societal and environmental challenges, and unprecedented technological change, affecting higher education systems, academic mobility, working patterns, welfare systems and ways of life. It will be crucial to further promote the acquisition of knowledge, skills and attitudes through lifelong learning, technical training, entrepreneurship and vocational training that facilitate transitions of young people from education to quality, fulfilling employment, as part of an overall strategy to modernize higher education and labour market systems. Higher education can foster forward-looking initiatives to help match the supply and demand of competencies for work and life in tomorrow's world. This focus area will address the following questions:

- How can “interdisciplinarity” be further promoted as the way of allowing people to learn by making connections between ideas and concepts across different disciplinary boundaries?
- How could we deliver the promise of better transitions between higher education and work?
- What role for higher education institutions in supporting lifelong learning?
- How can higher education contribute to more inclusive, peaceful and sustainable societies?

Digitalization and Connectivity

Artificial Intelligence, Big Data, and online learning platforms are having increasing impacts on education systems worldwide, including the higher education and research communities. Digitalization is the process of breaking geographical and cultural boundaries, allowing teachers, educators and students to take their knowledge beyond the classroom, potentially to a worldwide audience. Thus, digitalization is not only about innovation or technology, but is also a matter of culture and the capacity to foster connections. Yet, affordable connectivity for learning and meaningful access to digital technologies is a global challenge and there are enormous disparities between and within countries to address. Efforts are currently underway to help steer the digital transformation of education towards equity, inclusion and quality. This focus area will explore the following questions:

- How could higher education create more inclusive, engaging and effective education processes through affordable connectivity and digitalization?
- How to facilitate integration of digital technologies with existing models of teaching and learning?
- How to meet different learner needs by using digital technologies to customize education?
- How to facilitate collaborations, develop educators' capacities and enrich the content of learning?
- How might digitalization and connectivity further support lifelong learning?
- How to address the ethical issues relating to the use of digital technologies in higher education and research settings?

Forum Structure

Following an introductory high-level segment that frames the Forum, two expert panels will be devoted to: (1) Skills for Work and Life, and (2) Digitalization and Connectivity, bringing in international and interdisciplinary perspectives. Finally, the Declaration of the Italian UNESCO Chairs for Sustainability will be introduced and presented. The International UNESCO Chairs Forum on the Futures of Higher Education will be held in hybrid mode and livestreamed on [Facebook Italy Expo 2020](#) and [YouTube Italy Expo 2020](#).

Working language: English.

Provisional Agenda

24 January 2022

11:00 to 13:00 Dubai time

Hybrid event

THE FUTURES OF HIGHER EDUCATION Collective intelligence for knowledge and learning

<p>11:00 – 11:15</p>	<p>Presenter: Lorenzo Micheli, Education Programme Manager, Italy Pavilion at Expo 2020 Dubai</p> <p>Welcoming remarks</p> <p>Mr. Paolo Glisenti, Commissioner General of the Italian Pavilion</p> <p>Opening remarks</p> <p>Ms. Stefania Giannini, Assistant Director-General for Education, UNESCO [4 min.] H.E.
